

3D
Mammography
is our standard of care.

St. Luke's Hospital Mobile Mammography Services

Offering the convenience of onsite 3D mammograms

The St. Luke's Hospital Mobile Mammography Van makes getting a mammogram more convenient by coming directly to you. In addition to its regular schedule of visits to various community sites, the van can be scheduled for visits to businesses, schools and other organizations as a stand-alone employee health offering or as part of an existing St. Luke's Hospital Passport to Wellness partnership. Help your employees get the preventive healthcare they need right on site in just 15 minutes rather than taking a half-day away from work.

St. Luke's Mobile Mammography Van offers 3D screening mammograms for women ages 40 and over.

Scheduling the Mobile Mammography Van

- The Mobile Mammography Van can be scheduled Monday through Friday.
- St. Luke's provides promotional materials for van visits, and patients call a dedicated line at St. Luke's (314-205-6267) to schedule an appointment.
- Promote the event as soon as possible. St. Luke's reserves the right to cancel any planned mobile mammography van event if there is not a minimum of 15 appointments scheduled at least 7 days prior to the event. The key to a good response is good promotion. You are welcome to invite surrounding businesses. (Email or share printed flyers with them.)
- In the event St. Luke's determines it is not safe for the van to travel, you will be notified as soon as possible. We will contact all patients to reschedule their appointments. If your facility is closed due to inclement weather, the van will not make its scheduled visit. Appointments will be rescheduled for the same time when a makeup date is determined.
- The van is not wheelchair accessible.
- Van space requirements: The van is 42½ feet long, 12½ feet tall, and weighs 2 tons. It needs 4 pull-through lanes (2 in front, 2 in back) or 8 parallel spaces to be able to park.

Health Insurance/Costs

- There is no charge to the business or employer for having the Mobile Mammography Van come on site.
- As of January 2019, annual screening 3D mammograms are a covered benefit under all insurances in the state of Missouri.
- Most insurances are accepted. St. Luke's will submit all claims to participating insurance companies.
- St. Luke's Hospital is committed to saving lives through early detection. Women who are uninsured may be eligible for free mammograms — please contact us at 314-205-6267.

Quality of Services

- Mammograms on the Mobile Mammography Van are performed by registered mammography x-ray technologists.
- All mammograms are reviewed with CAD (computer-aided detection), the most advanced technology available to aid radiologists in reading mammograms and detecting breast cancer early.
- St. Luke's Hospital is accredited in mammography by the American College of Radiology (ACR) and by the National Accreditation Program for Breast Centers. St. Luke's has been designated a Breast Imaging Center of Excellence by the ACR.

Our specialty is you.
